

# Custom AUTO ELECTRICS

## February Sale

Make a purchase during February 2018 and receive 10% off all Tunits! This includes Tunit original, Tunit Advantage, Tunit Optimum, Tunit Power Pedal and Tunit Package Deals!

Tunit has the ability to increase power and torque by up to 20%. Intercepting the signals between the ECU and the Injection System, the Tunit allows more fuel injection into the cylinders thus producing more torque and power.

The Tunit has been proven to reduce harmful emissions by up to 27% and improve fuel economy on average by 12% in comparison to other Chip Tuning and Remapping options that doubled dangerous exhaust emissions

Every Tunit is individually programmed to maximise the performance of every diesel engine. When necessary, the Tunit can be easily changed if required, for example, when more power and torque is needed for towing.
